EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In **Claim 15**, the last line, a period (.) has been inserted after the last word "dogs" in order to complete the sentence.

3. The following is an examiner's statement of reasons for allowance: Claims 1 and 18 are allowable because the prior art of record fails to teach or fairly suggest a probe for measuring the surface temperature of a pipe, the probe comprising a detector assembly including a rigid, unitary clamp member having first and second locking dogs extending upwardly from an upper surface defining a gap having a width W_G therebetween, and a strap having a rectangular shape and extending longitudinally from a proximal end portion to a distal end portion, the strap being flexible and longitudinally resilient and having a thickness T_U in an unstretched condition and a thickness T_S in a stretched condition, where $T_U > T_S$, $T_U > W_G$, and $W_G > T_S$; so that when the probe is mounted to the pipe by wrapping the strap around the pipe, applying a tensile force to the distal end portion of the strap, the thickness of the strap decreases from T_U to T_S , and by removing the tensile force, a segment of the strap disposed between the first and second locking dogs expands to a thickness substantially equal to W_G to clamp the strap between the first and second locking dogs as defined in the claims, in combination with the other limitations, each arranged and functioning as recited in Claims 1 and 18. Claims 1-17 and 19-21 are allowable by virtue of their dependency upon the respective of claims 1 and 18.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the form PTO-892 and not mentioned above disclose related temperature sensor mounting devices and methods, except that Gonzalez (US 6513210 B1) discloses a related elastic fastening device and CARPENTER *et al* (US 3087700 A) discloses a related clamp and cinch strap having some features in common with the invention.
